

The Jeans Collection

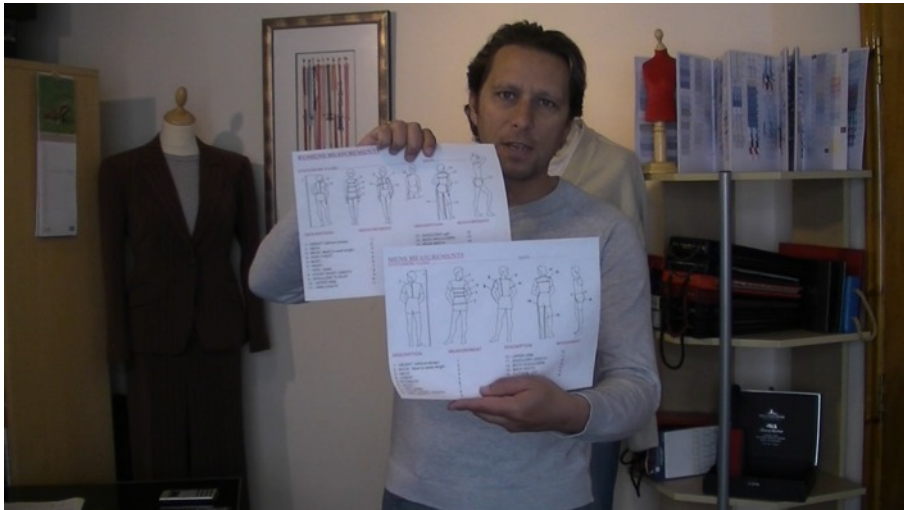

Video 2 - How to measure

The tools that you will need:

- 1. Measurement sheet*
- 2. A pen or a pencil to record your measurements.*
- 3. Tape measure*

Part 1 - The measurement sheets.

The first thing to do is print off one of the body measurement sheets for either a lady or a gent depending on who you are measuring the jeans for. These sheets are in a PDF format so they can be easily printed from the site. Next is to produce a measuring sheet of your own with the pattern measurements and adjustments

Print off a measuring sheet for a lady or a gent

Make up your own measurement adjustment sheet as well as the original measurement sheet

Part 2 - Lets start measuring

With the tape measure you need to measure the waist, the hips the outside, the inside leg seams and the seat (crotch). For ladies measure waist to hip. Each time you measure record your measurement onto the measurement sheets.

Measuring the hips.

Measuring the inside leg seam.
